Experience

BMO - *Software Developer Intern - (May 2019 - Sep. 2019)*
- Built UI Mockups on the Minimum Viable Product(MVP) for a new BI tool. Implemented a standard on how to build UIs for the Web App to ensure that work completed by different teammates was identical.
- Used **Javascript**, **JQuery**, **HTML**, and **CSS** to build mockup UIs and the MVP.
- Built a regression analysis tool in Python for the BAs on my team. Collectively, the tool reduced 20 hours of work per week for the BAs.

Knowtworthy - *Software Developer and Co-Founder - (Sep. 2017 - Present)*
- Worked with my co-founders to engineer our meetings productivity tool from mockups to MVP that we tested with over 100 signups.
- Built the backend API using **Node.JS** & **MongoDB** and the streaming server using **Golang** & **AWS SQS**.
- Setup hosting on **AWS** & **Kubernetes** and the metrics/logging pipeline on **Elasticsearch** & **Kibana**.

BDM Trucks - *Freelance Web Developer - (Sep. 2017 - Nov. 2017)*
- Updated their hosting and DNS records to lower IT costs.
- Rebuilt their website with a modern design and mobile view to help customers access the page on the go.
- Used **Bootstrap 4**, **HTML**, and **CSS** to build the website.

SBIRT - *Freelance Software Developer - (Oct. 2015 - Dec. 2016)*
- Built an **Android** and **iOS** app to help researchers track drug abuse in their local area using data submitted from clinicians.
- Built an API backend using **App Engine** and **MySQL** to collect the data from the apps.

Skills

Languages	Tools	Frameworks	Clouds
Javascript	Docker	Node.JS	AWS
Python	MongoDB	React	GCP
Golang	Git	Express.JS	
Java	Kubernetes	Koa.JS	
Rust	PostgreSQL		
	Elasticsearch		

Education

University of Toronto - *Statistics and Cognitive Science - (Sep. 2017 - Apr. 2021)*
- Affiliated with the University of Toronto's Entrepreneurship Hatchery
